Lexipol

BIG INDEPENDENT CITIES EXCESS POOL

Risk Management Seminar: Best Practices for Public Entities

9:00am - 9:30am	Registration/Continental Breakfast
9:30am - 9:45am	Opening Comments
9:45am - 10:45am	<p>New Horizons: Drones and Regulatory Challenges for 21st Century Law Enforcement Presented by Gary Schons Head of Public Integrity Department Best Best & Krieger, LLP</p> <p>As domestic use of drone technology becomes mainstreamed, use of Unmanned Aerial Vehicles law enforcement activities is likely to increase exponentially. This brings with it both a series of opportunities for law enforcement and attendant risks of implementation. Proponents argue law enforcement use of drones will save time, money, and even officers' lives. Others contend law enforcement use of drones is likely to create privacy issues, propagating a surveillance state. This session will offer attendees insight into the regulatory and constitutional challenges that face law enforcement as departments move to implement drone technology in day-to-day law enforcement scenarios, from the rules being propagated at the federal, state, and local levels, to the various potential uses and the challenges each of them present.</p>
10:45am – 11:00am	Break
11:00am – 12:00pm	<p>Social Media: Investigating A Global Village Presented by Garrett McGinn Director of Intelligence Division DigiStream Investigations</p> <p>Learn how social media is being used to uncover fraud as well as enhance the quality of other investigations. The session examines successful real-life cases, fascinating trends in social media investigations, privacy and legal issues, as well as preserving, authenticating and presenting the evidence in court. The dynamic between social media monitoring and surveillance will also be examined through a case study involving 16,000 days of surveillance data. Attendees will come away with an understanding of the investigative best practices required for a successful investigation, as well as how to refer a file and ensure maximum success.</p>
12:00pm – 1:00pm	Lunch
1:00pm – 2:00pm	<p>Body Worn Cameras: Common Sense Amid the Craze Presented by Ken Wallentine Vice President and Senior Legal Advisor Lexipol</p> <p>Recording police activity through body cameras is an increasingly common practice in law enforcement. Proponents say cameras are a useful risk management tool offering protection, accountability, and limiting liability. Others argue that body worn cameras pose a significant threat to personal privacy, with limited public utility and high hidden costs. This session will offer attendees different perspectives and insight into the selection, use of body cameras in law enforcement activities, sensible and workable policy guidance, and related considerations for public officials, risk managers and public safety executives. The presenter is a recognized national use of force expert who has testified in numerous trials where force incidents were captured on video. He has assisted over 1,000 police agencies with policies on use of force and body worn video capture.</p>

MANY THANKS TO OUR GENEROUS SPONSORS!
